KSU has a home football game November 1st.
Reserve early!

Sale Order/Video Format

Cattle will sell in Catalog Order. Cattle will be on display leading up to sale time with a video of each animal displayed during the auction. Come early for viewing! **Videos will be available on DVAuction.**

Supplemental Information

A Sale Day Supplement Sheet correcting or updating information in this catalog will be provided at Sale time. Information on this Supplement takes precedence over cataloged material. The Supplement will also be available online.

Viewing of Cattle Prior to Sale Day

Cattle are available at IR Headquarters for viewing. Please call ahead for one of the Irvines to walk you through the cattle.

Insurance:

Livestock Insurance will be available sale day. We strongly recommend that you protect your investment with insurance immediately following the sale.

Selling 113 Head

83 SimAngus and Simmental Bulls
30 Spring Bred Commercial Females

Delivery:

Free delivery is offered on sale bulls within 250 miles of Manhattan, and within 50 miles of Manhattan on the bred heifers. This free delivery option is only applicable for purchasers taking delivery immediately following the sale. In the interest of arranging efficient routes, delivery may be to a central point close to your location. For Buyers picking up their purchase at Irvine Ranch by 11/8/2025, \$100 will be discounted for the 1st Lot. Each subsequent Lot will be Discounted \$50/Lot.

Disposition Guarantee:

Irvine Ranch stands behind the dispositions on the bulls with a “Disposition Guarantee”. Each bull has been disposition scored to assist in your decision making, noted in the lot information as the “Docility” Score. Scores of 1 and 2 are the easiest to handle bulls. 3’s are manageable, but the bull has shown to be more nervous. Bulls scoring 3 or greater may require a different level of management and respect in handling. This score is based upon our interactions with the bull to date. As an animal gets older, or with handling, its attitude can change. Also, bear in mind all animals have some element of unpredictability and are deserving of respect regardless of docility score.

Health/Herd Veterinary Care

A Health Certificate will be provided as required for transportation in Kansas and beyond within the continental US. If you are an out of State purchaser, the process to meet the health requirements within your State will be started immediately following the Sale.

This process can take a few days, depending upon the requirements within your State. Irvine Ranch will feed and house your animal(s) during this process.

Dr. Shelie Laflin, DVM - Herd Veterinarian

Dr. Lee Penner, DVM - Consulting Veterinarian

Biosecurity:

Irvine Ranch has taken a proactive approach with respect to disease control. We began annually testing our entire herd for BLV, BVD-pi, and Johne’s in 2010, and only sell cattle that are free of these diseases to the best of our knowledge. All of the cows selling were calfhood vaccinated for brucellosis. All bulls selling are virgin bulls unless otherwise noted.

SALE INFORMATION

Irvine Ranch Breeding Guarantee and Sale Terms:

All bulls in this sale have passed a breeding soundness evaluation by Dr. Shelie Laflin. If a bull becomes a non-breeder within 12 months of his purchase, Irvine Ranch will either provide you with a suitable replacement, if one is available, or provide you with a sale credit equal to the bull’s purchase price less his salvage value. This guarantee does not apply to bulls that die, are killed, or are injured through no fault of Irvine Ranch. It is recommended that if you use your bull for the first time in the spring of 2026, he should be re-evaluated for breeding soundness prior to breeding time.

Irvine Ranch offers this guarantee in addition to the American Simmental Association suggested Sale Terms and Conditions. In our effort to provide both quality breeding genetics and customer service, we ask that you let us know if you are not satisfied with your purchase for any reason.

Irvine Ranch Retained Semen Interest:

Irvine Ranch is retaining a 1/2 semen interest in all bulls selling in this offering. The purchaser of the bull will have full possession of the bull unless otherwise noted, and all salvage value rights. In the event of any semen sales from the bull, then Irvine Ranch is retaining 1/2 interest in the gross revenue from all semen sales. Irvine Ranch retains the semen interest if the bull is sold to subsequent purchasers. Irvine Ranch also reserves the right to collect semen from the bull at the buyer’s convenience and our expense. This retained semen interest extends to any clone of the bull. Please contact John with questions prior to the sale.

Terms and Conditions

Cash or check will be accepted. If you purchase over the phone or through a representative we ask that you mail a check on sale day. Payment is required before cattle are shipped from Irvine Ranch. All cattle sell under the Terms and Conditions of the American Simmental Association and as noted in this catalog. Registration certificates will be transferred by Irvine Ranch. All persons attending the sale do so at their own risk. Irvine Ranch and its owners assume no liability for property damage or accidents that may occur.

 **Bovabytes**TM
Insight in every bite

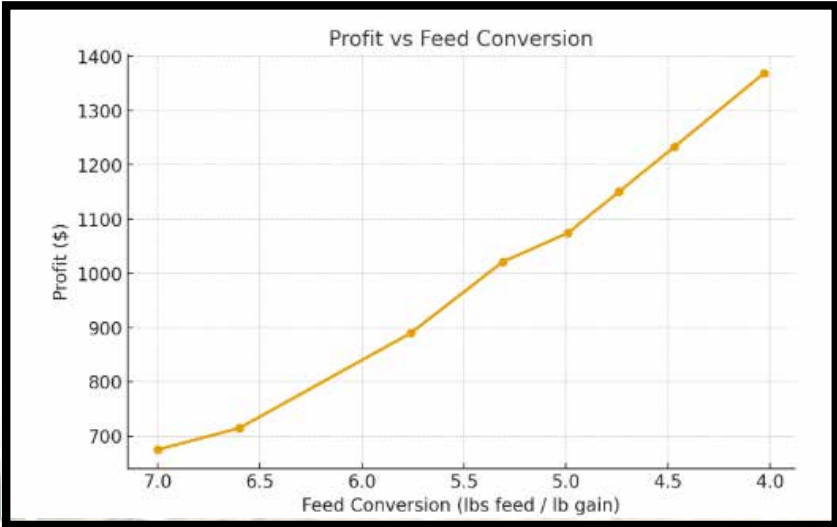

Irvine Ranch's exclusive, patented feed efficiency technology

Less Feed... More Beef

Feed conversion is one of the most important drivers of profitability — whether you’re maintaining a cow herd or finishing cattle in the feedlot. Hidden within the dynamics of the herd or feedlot group are significant differences on an individual basis.

This is where Bovabytes makes a difference. By measuring actual individual intake and performance, Bovabytes allows us to “pull back the curtain” and find these profit-determining differences. Below is a chart showing the value of incremental improvement in conversion over two recent studies conducted through Bovabytes.

Our data indicates there is typically a \$700 to \$1000 range in individual profitability in a pen of cattle as a result of feed efficiency!

Proof in the Prime!

Backed by Data, Confirmed by Our Customers

Irvine Ranch feeds home raised cattle and purchased customer cattle, as well as gathering data on IR sired cattle fed by others, in an effort to validate our genetics and document the value added opportunities available to our customers. Below is recent close out data on a group of IR sired heifers.

Thank you to Gary Vandiver and Nathan Smith with Top Dollar Angus for furnished this data.

“Carcass Quality has improved in our finishing program since we started using Irvine Ranch Genetics bulls. Great genetics, great quality, great program. The numbers and the data don’t lie.”

Jeff Thoele and Cole Davis,
5 year Customers, Kansas

At **Irvine Ranch**, we believe cattle should do more than just fill pastures — they should build ranches and sustain families. That’s the foundation of our Ranch Maker bulls and Ranch Mother cows.

● **Ranch Maker Bulls**

A great bull changes the trajectory of a herd. With every calf crop, he passes on growth, efficiency, and consistency — the kind that make a ranch more profitable, more predictable, and easier to manage. Our bulls are designed to sire daughters you want to keep and steers the feedyard demands, multiplying their value across generations.

● **Ranch Mother Cows**

Behind every strong ranch is a foundation of reliable cows. Our Ranch Mothers are fertile, functional, and built to last — raising calves that thrive, rebreed on time, and keep input costs low. They’re the kind of cows that stay in the herd year after year, building equity and leaving a lasting legacy in commercial cow-calf programs.

Together, Ranch Maker bulls and Ranch Mother cows create the kind of cattle operation that’s built to last — **profitable today and sustainable for tomorrow.**

What Irvine Ranch customer’s are saying about their Ranch Mothers Cows

“It’s really easy to appreciate the quality of females that are sired by Irvine Bulls. They are soft sided, easy doing females that you love to look at. They have proven to be functional in the real world by maintaining longevity with foot and udder quality.”

10 year IR customers, Randy and Landon Roberts, Indiana

“Irvine Ranch Genetics have improved the quality of our replacement females tremendously. Great milk, calving ease, docility and longevity.”

12 year IR customers, Enos and Gage Grauerholz, Kansas

“We purchased our first Irvine Bull in 2011 and have been impressed with the replacement heifers coming out of these bulls. My wife and kids do most of the cow checking and its nice to have easy calving cows that don’t try to run you over when tagging their calf.”

14 year IR customer, Edgar Pralle, Kansas

“I feel that the biggest impact on our herd since using Irvine Ranch bulls has been the quality and consistency of our replacement heifers. Cattle need to fit their environment to be profitable long term. Irvine bulls have the moderation to produce offspring that I feel would work in a wide range of conditions.”

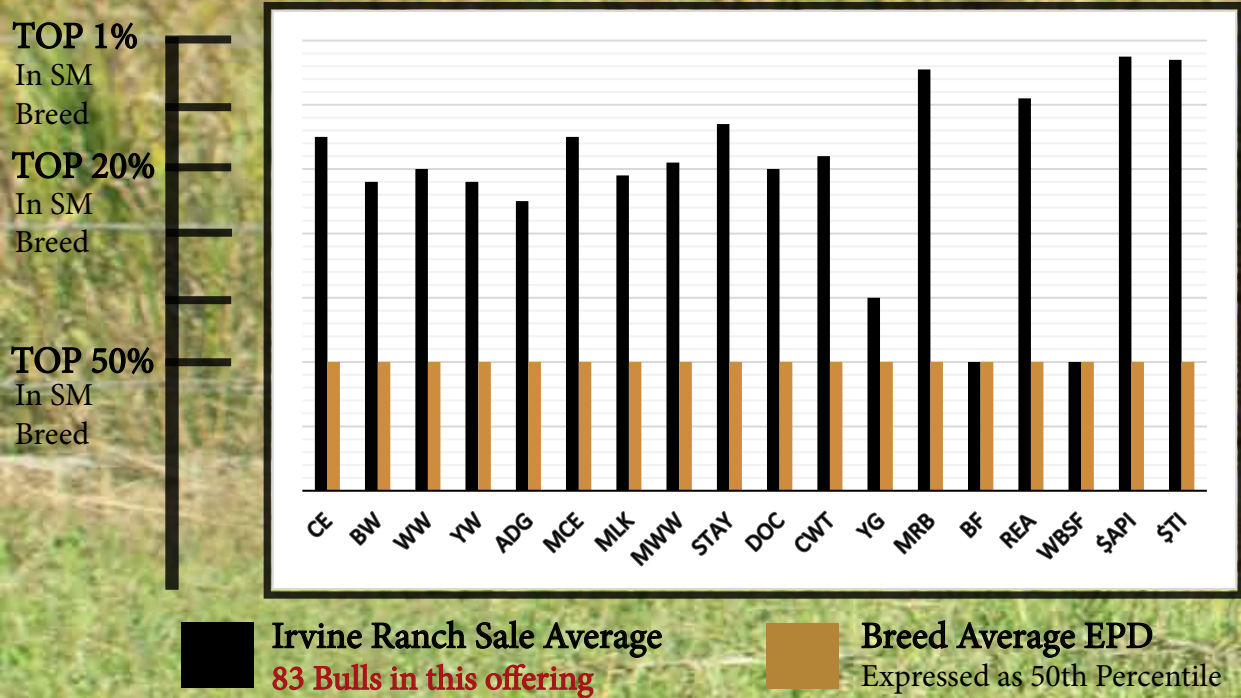

10 year IR customers, Joe and Tanner Schmidt, Kansas

83 Ranch Maker Bulls

The 2025 “Ranch Maker” Bulls

A Ranch Maker bull is one that helps build the future of an operation. His genetics stamp calves with growth, efficiency, and consistency. He adds value where it matters most: calves that weigh up, feed efficient, and hang carcasses that hit the grid. From beginning to end, the 2025 offering are bulls designed to do just this.

The genetic comparison chart below represent the genetic improvement Irvine Ranch has achieved through a long term, disciplined approach.

“Irvine Ranch has been an important partner in our cattle operation. We’ve experienced better weaning weights, a more uniform calf crop in size, weight & color, and increased sale prices & profitability. Repeat buyers at the sale barn like the way the calves perform for them.”
Dave Umscheid, 18 year customer, Kansas

Lot 1, M787, embodies everything we strive to deliver — genetics that add value for our customers and across the beef business. He is truly a “Ranch Maker”... a bull designed to sire calves that hit the ground easy, grow fast and efficiently, yield a premium carcass while leaving behind daughters that repeat the process year after year. These are the kind that make a ranch more profitable, more predictable, and easier to manage. Ranking in the Top 10% of the breed in 14 traits and indexes! He is designed to add value not only in the pasture but across the beef supply chain.

*Every feed dollar saved resulting from efficiency drops straight to the bottom line. Ranch Maker earned the badge as “Feed Efficient” with a \$963.11 Bovabytes profit index, ranking 12% greater than his stout contemporary group.

*His dam and granddam have both produced Prime YG3 progeny through our system. Combining this with his carcass leading sire, Fireproof, and M787’s outstanding ultrasound ratios of 128 IMF and 107 RE, the stage is set for premium earning progeny.

*His dam, Astoria K251 is a moderate, perfect udder first calf heifer weaning M787 with a WW ratio of 113 at 60% of her body weight, and calving again 365 days later. Maternal predictability runs deep with breed greats Astoria, Z343, & 106Z stacked in his pedigree.

*Ranch Maker froze semen on the first attempt as a yearling.

IR Ranch Maker M787 is one of a kind and we are excited to see the good he can create.

Lot 2 - Another “Ranch Maker” bull bred to sire calves that hit the ground easy, grow fast and efficiently, yield a premium carcass while leaving behind replacement females that repeat the process year after year. One of only 8 SimAngus bulls in ASA’s database over \$200 API\$ and \$120 TI\$. M827 is calm, sound, and fertile... having frozen semen at 12 months of age. He delivers a rare balance of profit enhancing traits that will deliver in his calf crop and for future generations through his daughters!

One of the highest combinations of API\$ and TI\$ in the ASA Database!

DOCILITY	2	Top 1% \$API. Heifer safe bull. Older and ready to cover a larger group of heifers or cows.							

“We have used Irvine Ranch bulls on our yearling heifers for years. We have had calving seasons when we didn’t assist any of our heifers. The spring of 2025 with 46 heifers calved, only one was assisted. Also, we don’t sacrifice performance on the calves from their calving ease bulls.”

Joe and Tanner Schmidt, 10 year Customer, Kansas

Spring Bred Commercial Heifers

We are proud to offer this group of 30 Spring Bred Commercial Females. These are SimAngus heifers sired by Irvine Ranch sires. They are bred to two IR Lodestar H380 sons, Alta Genetics sire, IR Starlight (ASA #4308979) and IR Lodestar L669 (ASA #4309106). The heifers will sell in groups of 3. The winning bidder can select the groups he or she would like, taking one group or more than one group.

INTRODUCING IR PRIMETIME

712SM02001 ASA# 3861405 SimAngus 1/2 SM 1/2 AN
Homozygous Black Homozygous Polled DOB: 1/1/21

Bred by Irvine Ranch / Nickerson Simmental
Owned by Irvine Ranch, Manhattan, KS

- Combines the most proven and profitable genetics in the Angus and Simmental breeds.
- Genetics for feedlot efficiency coupled with top 1% marbling and top top 3% ribeye area will result in offspring valued by the feedlot and consumers alike.
- In the top 4% for calving ease and is moderate for birth weight.

John and Holly Irvine Family
Irvine Ranch, Manhattan, KS

PRIMETIME represents an unparalleled opportunity to add efficiency, muscling, and marbling to every HOLSim calf he sires. Whether selling day-old beef on Holstein calves or feeding them through harvest, PRIMETIME’s genetics are designed to enhance marketability and profitability.
